Our goal is to continuously provide a working environment that encourages new ideas and innovations for the successful growth of our company and its employees.

Our mission is to exceed our customers' expectations, providing quality products and premier services at competitive prices while maintaining first-class workmanship and integrity.

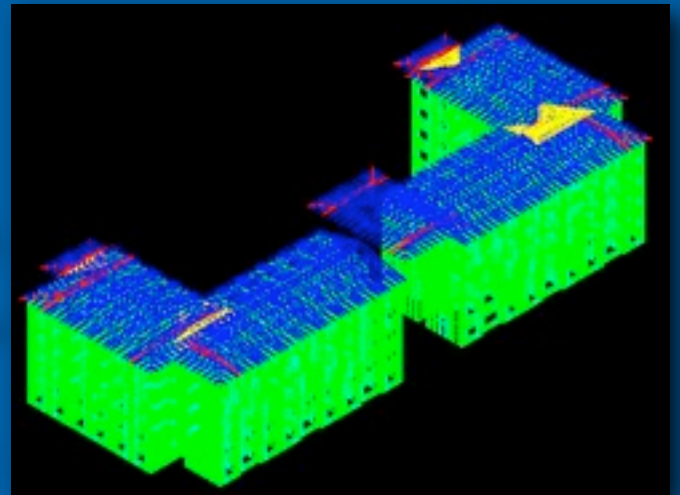

We commit to upholding our established foundation of business ethics and professionalism and continuing the development of our company.

TURN-KEY SUPPORT

Steel Construct Systems is capable of helping you start a project in the development phase with budgets and cost-effective building designs. This helps you keep costs down throughout the budget, supply, and erection phases of the structural package. Steel Constructs can assume the role “Engineer of Record” and we’re always willing to assist the design team.

3-D BUILDING MODEL

Steel Constructs can complete your design in 3-D for integration with other trades. This process allows ease of coordination with the design team, eliminates conflicts with other trades, and reduces erection complications for an expedited schedule.

LASER GUIDED JIG PRODUCTION

Steel Constructs’ production facility includes state of the art laser equipment for guided jig placement, ensuring quality throughout production. Lasers ensure accurate placement per the design submitted, eliminating human error. Lasers also reduce set up time, allowing 30% more production for expedited response times that meet your delivery needs.

12,000 SF FACILITY WITHIN HUB ZONE

Steel Constructs operates from a 12,000 SF facility with 4 acres of storage. Our facility is located in a HUB Zone. This offers an additional incentive along with Steel Constructs’ small business status, but without the loss of a strong labor force from local residents.

PROJECT MANAGEMENT

Steel Constructs adds the value of a qualified Project Manager to ensure mobilization is scheduled for convenience, coordinate with other trades, assist you on site, and answer questions. We offer this service at no additional cost to ensure the customer enjoys a smooth experience.
